Summary

Which continent are you from?

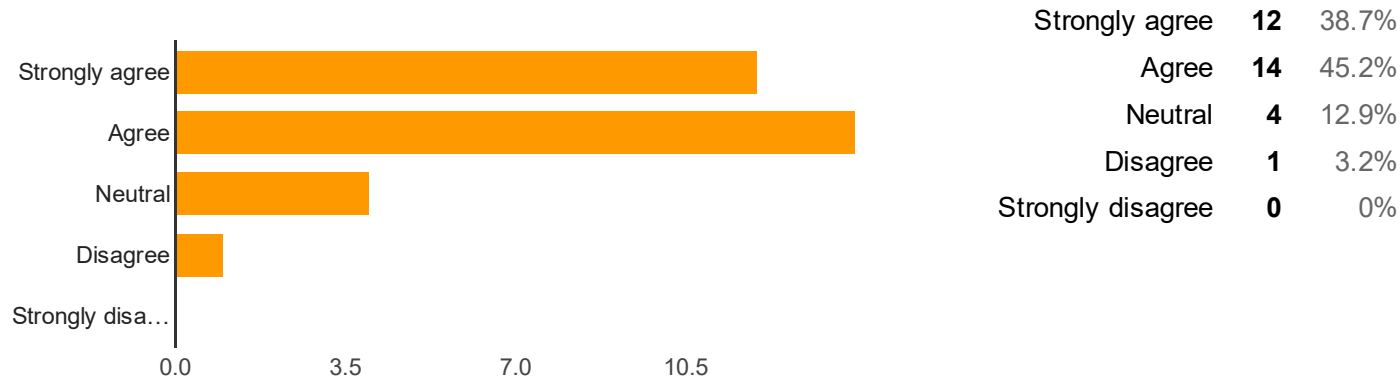

America	4	12.5%
Europe	16	50%
Asia	10	31.3%
Africa	2	6.3%
Oceania	0	0%

Air pollution is a major environmental risk to health [How much do you agree with the following?]

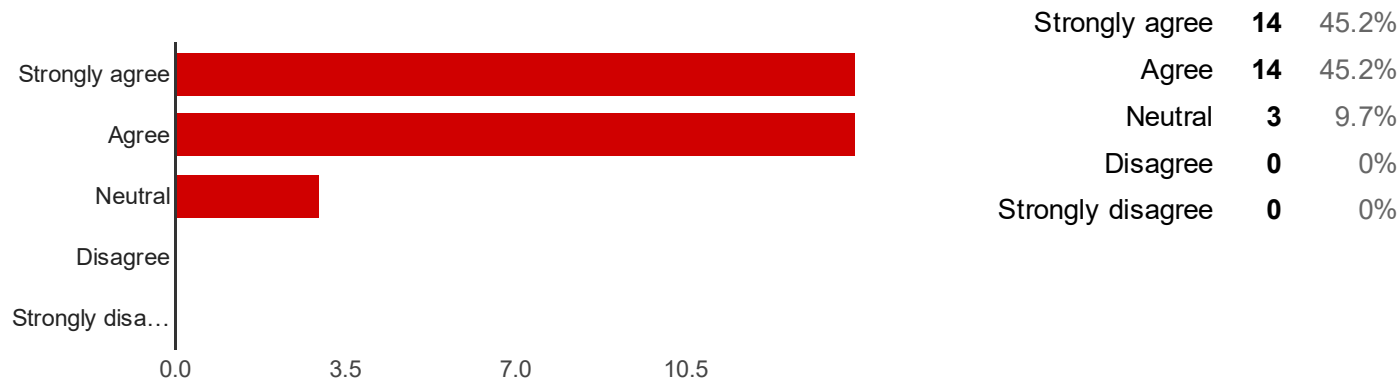

Strongly agree	19	59.4%
Agree	12	37.5%
Neutral	1	3.1%
Disagree	0	0%
Strongly disagree	0	0%

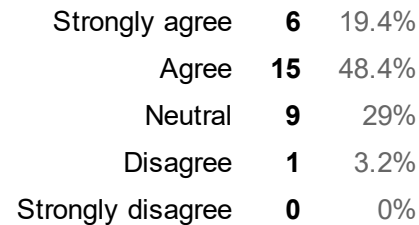

Polluted indoor air can be more harmful than outdoor [How much do you agree with the following?]

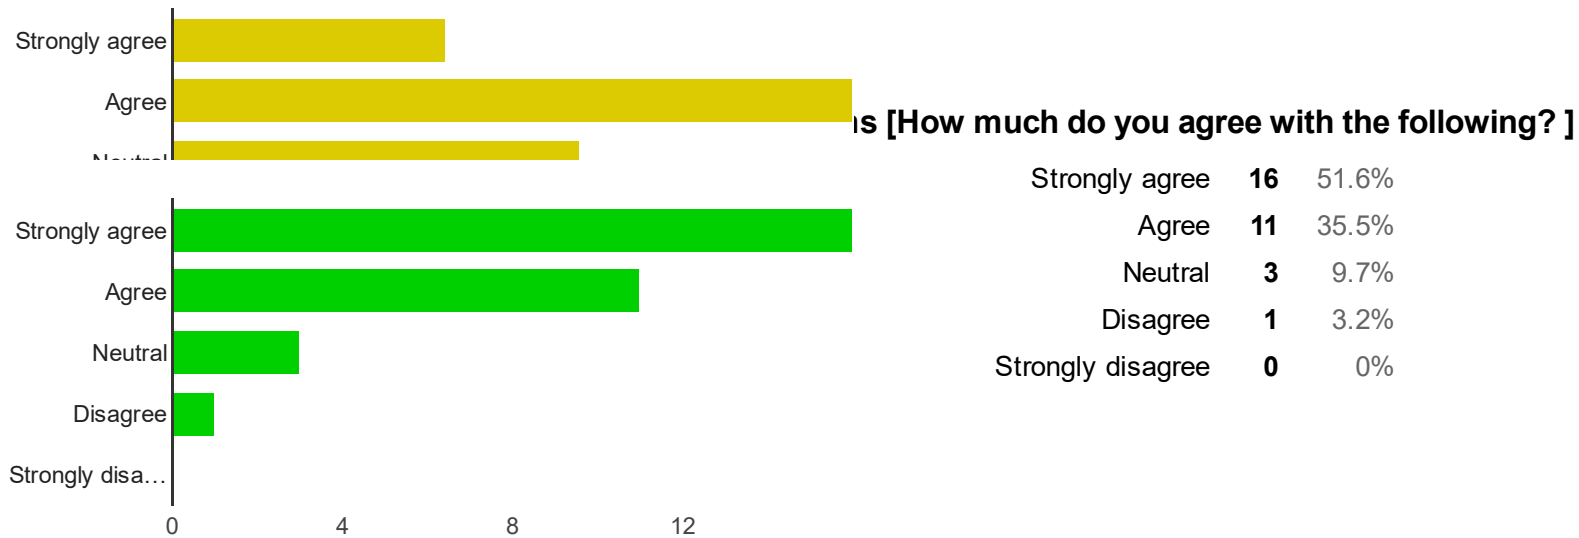

The extinction of species would have a direct effect on human life [How much do you agree with the following?]

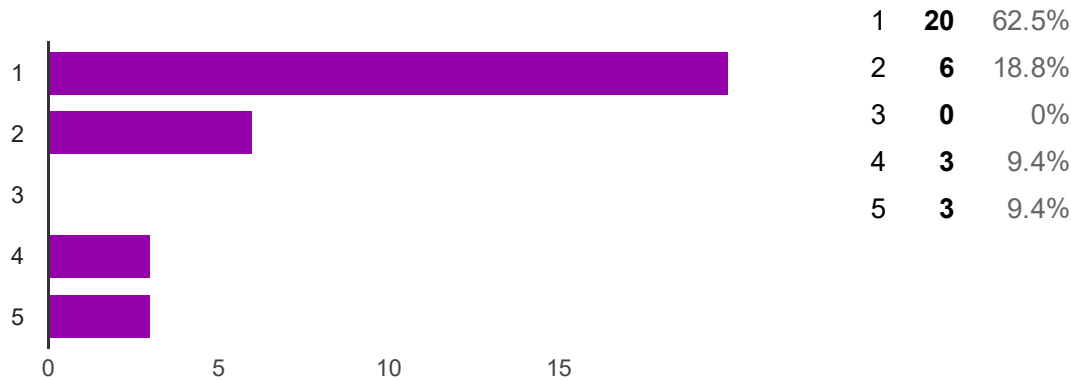

Extinction of species has an impact on the world economy [How much do you agree with the following?]

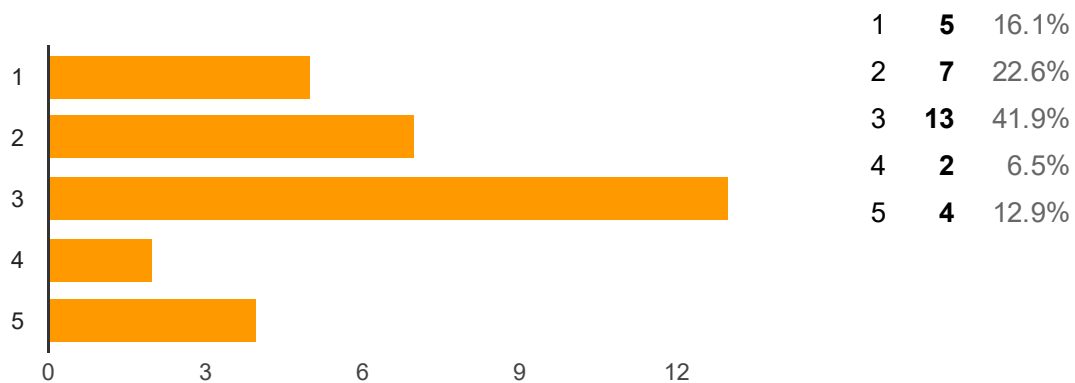

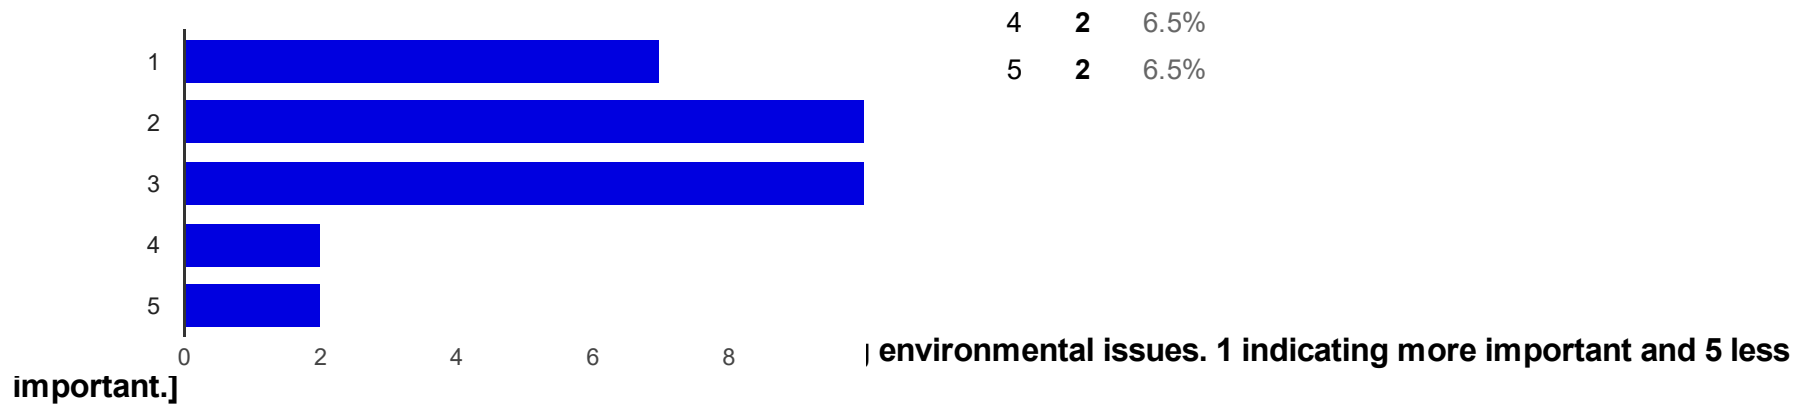

Breaking of the ozone layer [Rate the importance of following environmental issues. 1 indicating more important and 5 less important.]

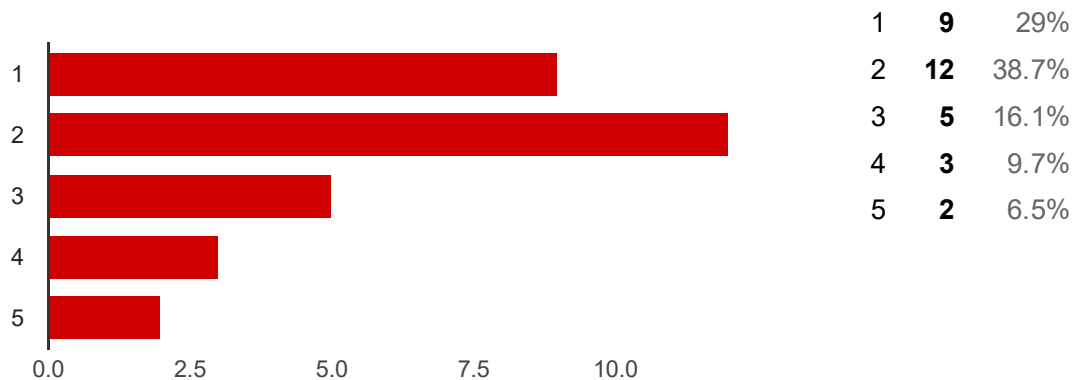

Destruction of coral reefs [Rate the importance of following environmental issues. 1 indicating more important and 5 less important.]

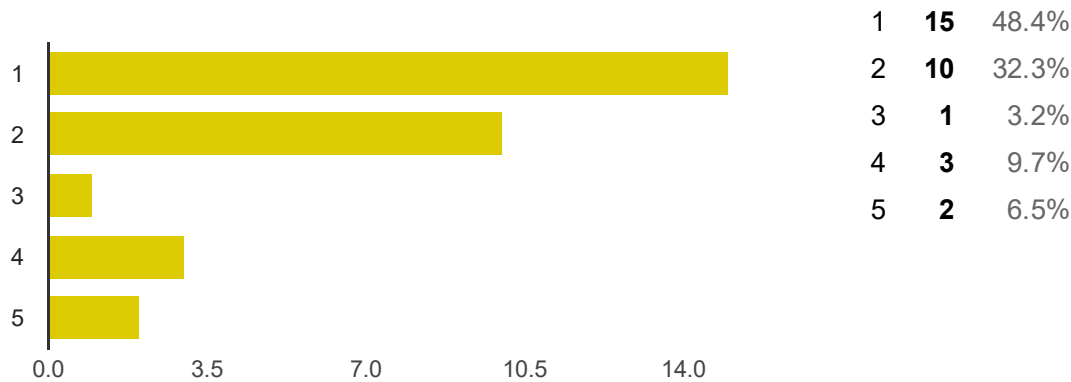

1	7	22.6%
2	10	32.3%
3	10	32.3%

Fishing and its effect on marine ecosystems, [Rate the importance of following environmental issues. 1 indicating more important and 5 less important.]

Limit industrial emissions or stimulate sustainable production [Rate the importance of following environmental issues. 1 indicating more important and 5 less important.]

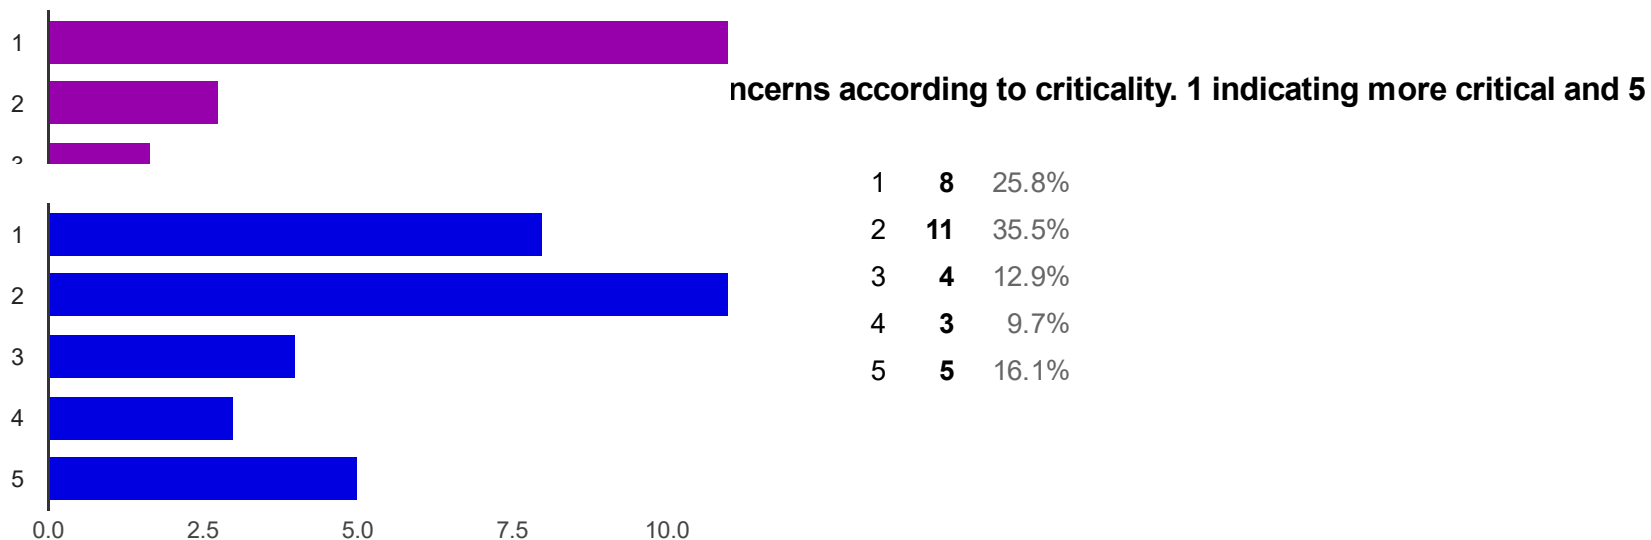

Is your home country suffering from any of the following environmental concerns?

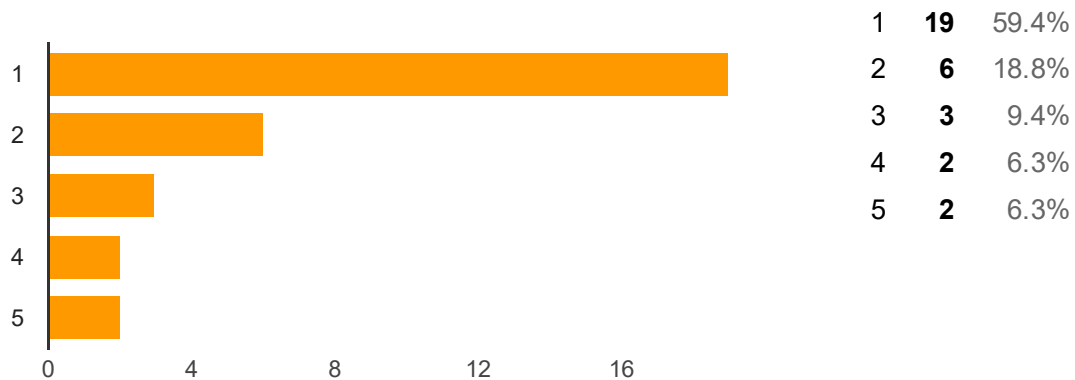

Air pollution [Order the following environmental concerns according to criticality. 1 indicating more critical and 5 less critical.]

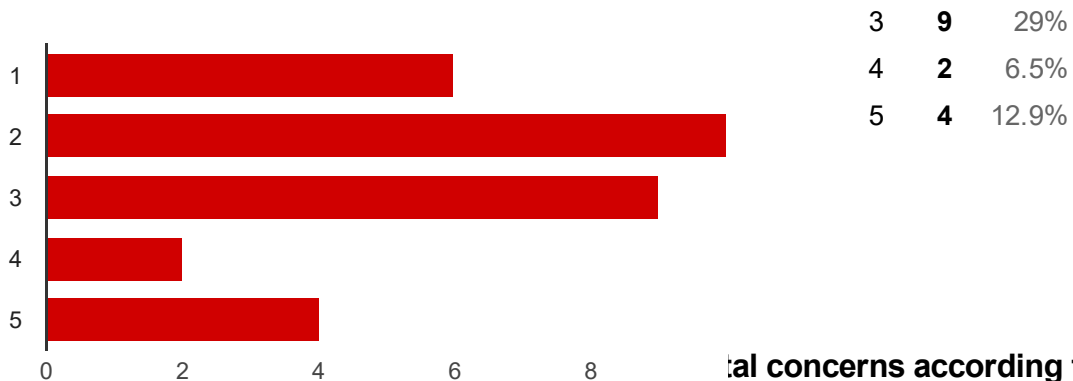

Climate change [Order the following environmental concerns according to criticality. 1 indicating more critical and 5 less critical.]

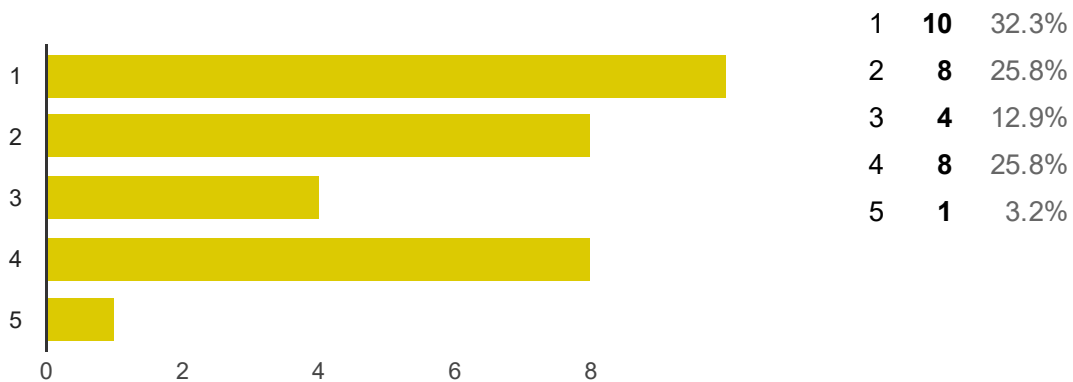

Food waste management [Order the following environmental concerns according to criticality. 1 indicating more critical and 5 less critical.]

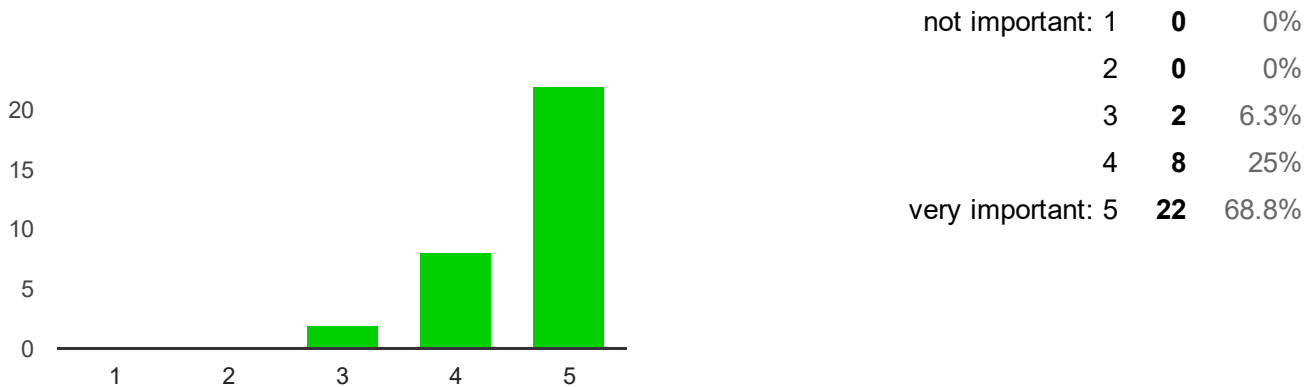

1	6	19.4%
2	10	32.3%

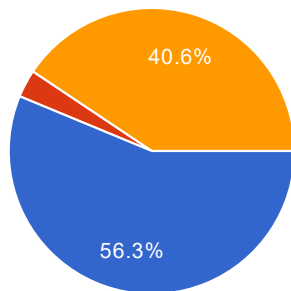

critical concerns according to criticality. 1 indicating more critical and 5 less critical.]

How important is for you to live in a high-quality air environment?

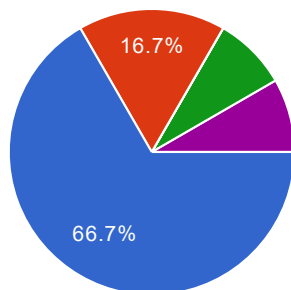

Would you be willing to report the quality of the air around you every now and then?

Yes	18	56.3%
No	1	3.1%
Maybe	13	40.6%

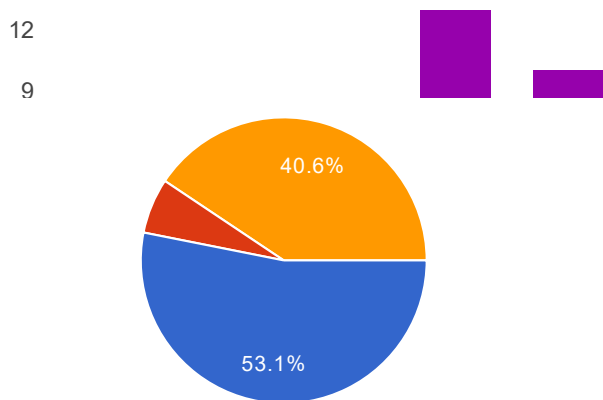

If not willing, what could be the reason behind your choice?

I don't have any tool for that	8	66.7%
I don't think my report can help	2	16.7%
I don't care about that	0	0%
It would not give me any benefit	1	8.3%
Other	1	8.3%

To what level do you think species diversity is important to maintain environmental sustainability?

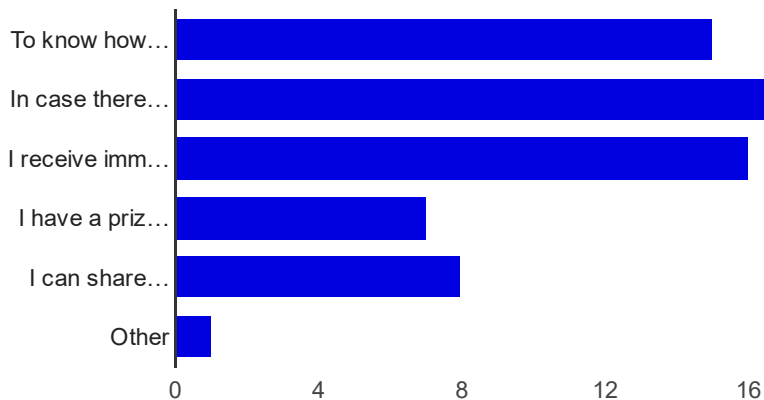

the least: 1	0	0%
2	2	6.5%
3	6	19.4%
4	13	41.9%
the most: 5	10	32.3%

When you believe important for maintaining species diversity?

Yes	17	53.1%
No	2	6.3%
Maybe	13	40.6%

What would motivate you to report about air quality and species?

To know how and to whom to report	15	48.4%
In case there is a specific tool (phone app can be one), it has to be easy to use	19	61.3%
I receive immediate feedback and result after submitting the report	16	51.6%
I have a prize/money in exchange	7	22.6%
I can share my report on social networks as well	8	25.8%
Other	1	3.2%

Please use this space to write anything regarding monitoring air pollution (maybe any experience you had, anything you would like to do to monitoring air pollution and issues related to species diversity)

I specific tool for doing that would be nice but if it is integrated with social media it will be easier to spread the news or views

I think it is important to have strict laws for increase people awareness

As foreigner, I would like also to have easy accessible info about air quality (in English, not just in language of the country in which I'm currently living).

i don't see motivation to report air pollution. I guess it is better to have some measurement devices, that can give much more clear picture than reporting from people

The monitoring system should be performed in a way that it would not require any employees but only volunteer citizens. The option of having monitoring tool a in a smartphone seems very interesting to me.

I monitored indoor air pollution from indoor cooking using charcoal stoves in Africa. I didn't have the right tools to do that.

Write your email if you would like to know about the results & more...
