

Leonardo DiCaprio

The person I want to present here is "Leonardo Wilhelm DiCaprio" known as "Leonardo DiCaprio". He is very well known person in the world and we all love him because of amazing roles in movies like "Inception," "Titanic," "Catch Me If You Cant," and "The Great Gatsby," just to name a few. He was born on November 11, 1974 in Hollywood, California, U.S. and he is an American actor and film producer.

The Leonardo Dicaprio Foundation, established in 1998, is protecting the Earth's last wild places by working on pressing environmental and humanitarian issues through grant making, campaigning, and media projects. Dicaprio produced the documentary film, "The 11th Hour", about the environmental state of the Earth, which included input from politicians, scientists, and environmental activists.

Dicaprio currently serves on the board of the World Wildlife Fund, the Natural Resources Defense Council, International Fund for Animal Welfare and Global Green USA. He's currently taking a well

deserved break from starring in films to recharge and dedicate time to environmental activism, reports the NY Daily News.

On the third anniversary of the historic Global Tiger Summit, the Leonardo DiCaprio Foundation has awarded a \$3 million grant to World Wildlife Fund (WWF) for a bold initiative to help Nepal double its wild tiger numbers by 2022 – the next Chinese Year of the Tiger.
